

# *JEU DU SNAP*

---

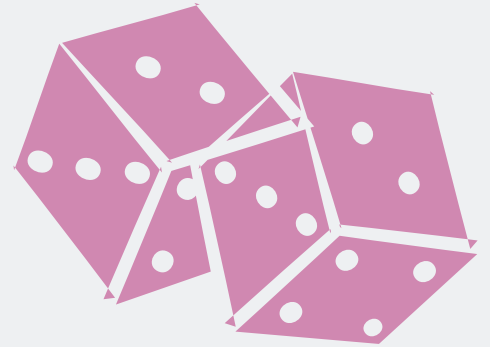

1, 2, 3 KID

# Jeu de *snap*

## But

Ce jeu permet d'apprendre à dénombrer de 1 à 6. Vous pouvez également augmenter la difficulté en ajoutant des chiffres jusqu'à 9 voire 10. D'abord c'est quoi dénombrer ? Eh bien lorsque l'on compte, on va compter les unités pour arriver au chiffre total (1,2,3 par exemple). Quand on dénombre, on arrive à savoir combien il y a d'unités sans avoir à compter. Vous voyez la nuance ?

Contient

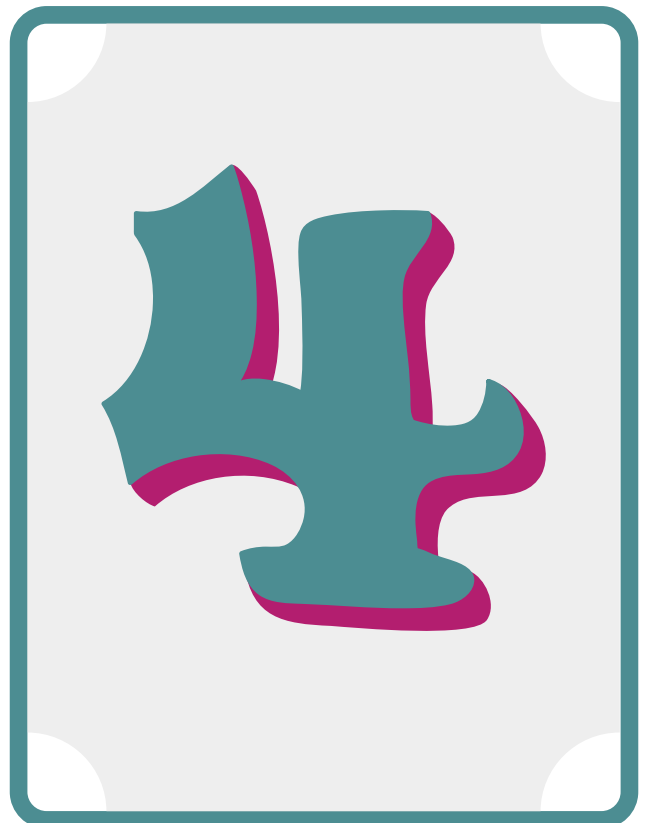

50 cartes à imprimer  
5 familles de 10 cartes

## Étapes

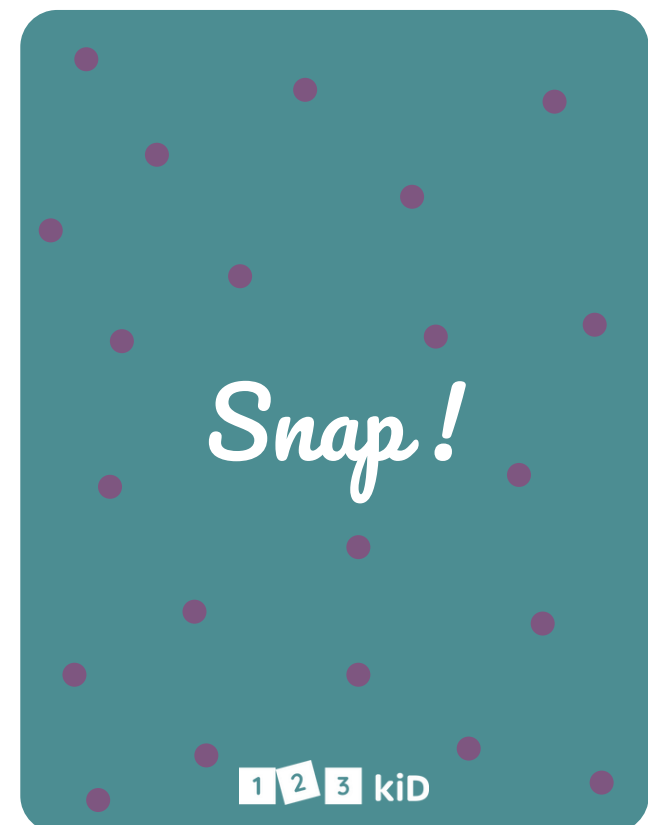

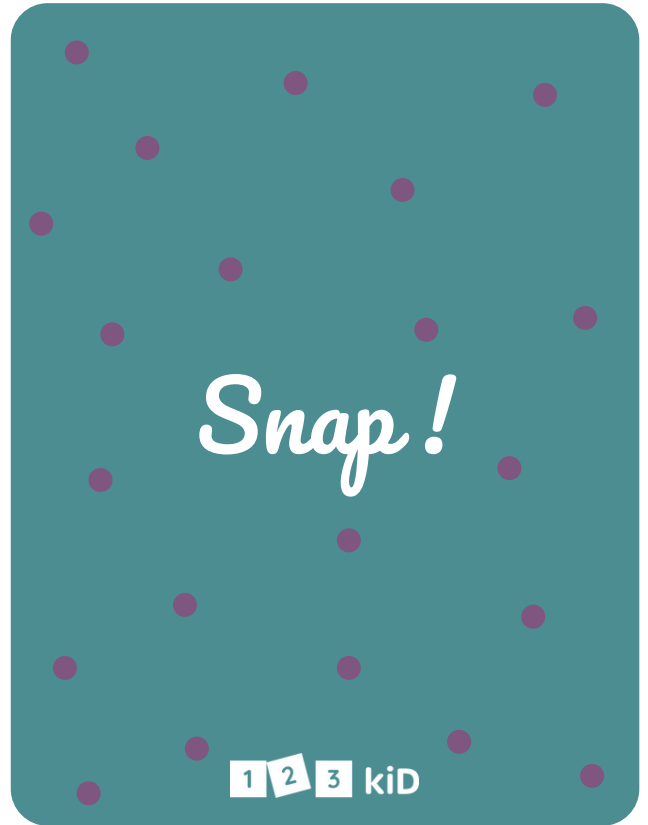

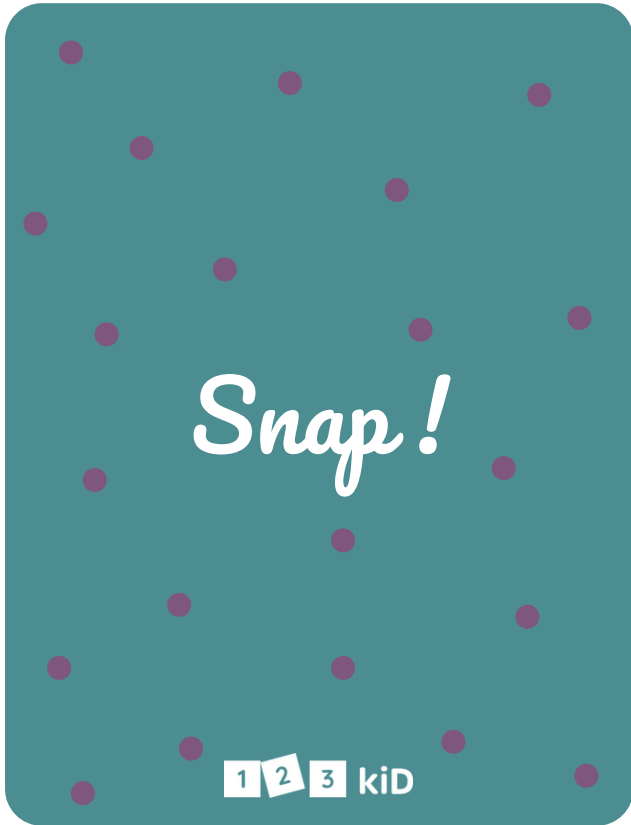

- On mélange les cartes et on les distribue à l'ensemble des joueurs.
- On pose le tas de cartes face cachée devant soi et on retourne en même temps la première carte du paquet : si les cartes représentent le même nombre, on doit taper le premier et criant "snap" (par exemple le chiffre 3 et 3 pommes).
- Si ce n'est pas le cas, on continue de jouer jusqu'à ce qu'il y ait un snap.
- Le premier joueur qui a tapé remporte le tas de cartes et on recommence jusqu'à ce que l'un des joueurs n'ait plus de cartes.

L'avantage de ce jeu est que mine de rien, il crée des automatismes chez les enfants pour apprendre à dénombrer et en plus, c'est rigolo !
